GULFSTREAM G650ER – EXTENDING THE REACH, LEADING THE CLASS

Gulfstream's newest flagship, the G650ER, extends the nonstop reach of the industry's highest performance long-range business aircraft to 7,500 nautical miles/13,890 kilometers at Mach 0.85. Flying even faster at Mach 0.90, the G650ER will carry eight passengers 6,400 nautical miles/11,853 kilometers. The additional range capability of the G650ER significantly

increases the number of nonstop connections possible between cities. No other platform in business aviation offers the combined utility of range, speed, performance and payload. Wide seats and generous aisle spaces are benefits of the G650ER, and the sense of spaciousness is further enhanced by 16 Gulfstream panoramic windows, the largest

in the industry, that stream sunlight into the cabin and galley. With the Gulfstream Cabin Management System (GCMS), passengers control temperature, lighting, window shades and

entertainment devices with Apple iOS or select Google Android touch-screen smartphones and tablets. The Gulfstream G650ER – establishing a new world standard for performance.
